READOUT

Invoice intake

Hallmann Maschinenbau × Avanai · 30 Oct

Most of the week, typing invoices.

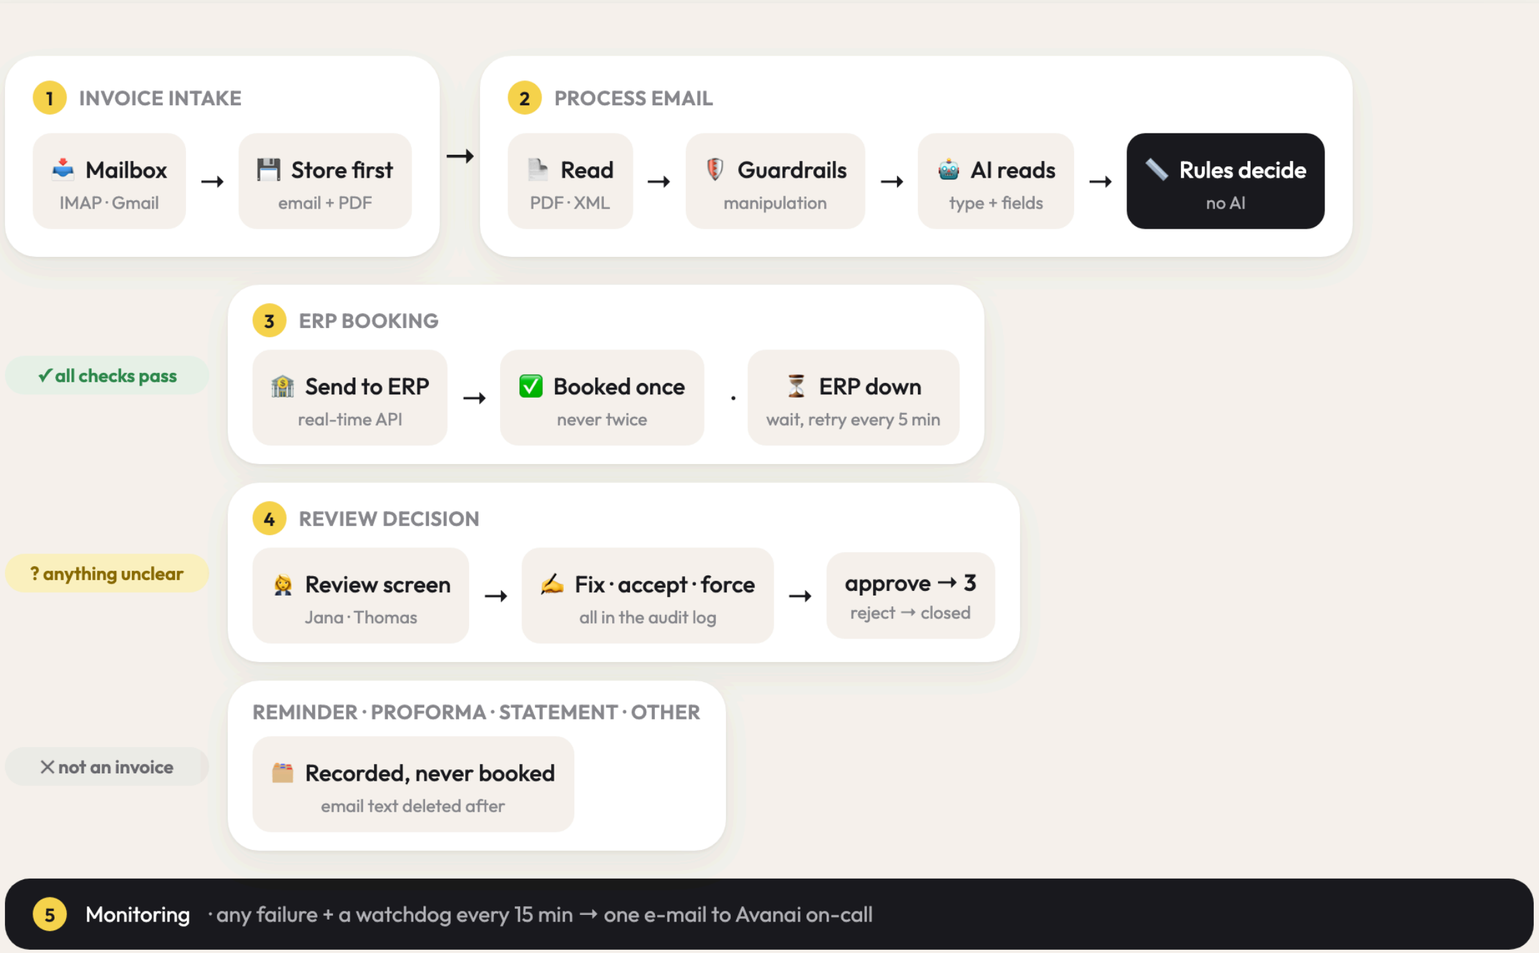

Jana and Thomas · several hundred a month

Net and gross, mixed up.
For weeks.

The last AI tool

Nothing wrong reaches the ERP.
Nothing gets lost.
Every change is traceable.

The journey

1 INVOICE INTAKE
Mailbox
IMAP · Gmail
Store first
email + PDF
2 PROCESS EMAIL
Read
PDF · XML
Guardrails
manipulation
AI reads
type + fields
Rules decide
no AI
✓ all checks pass
3 ERP BOOKING
Send to ERP
real-time API
Booked once
never twice
ERP down
wait, retry every 5 min
? anything unclear
4 REVIEW DECISION
Review screen
Jana · Thomas
Fix · accept · force
all in the audit log
approve → 3
reject → closed
✕ not an invoice
REMINDER · PROFORMA · STATEMENT · OTHER
Recorded, never booked
email text deleted after
5 Monitoring · any failure + a watchdog every 15 min → one e-mail to Avanai on-call

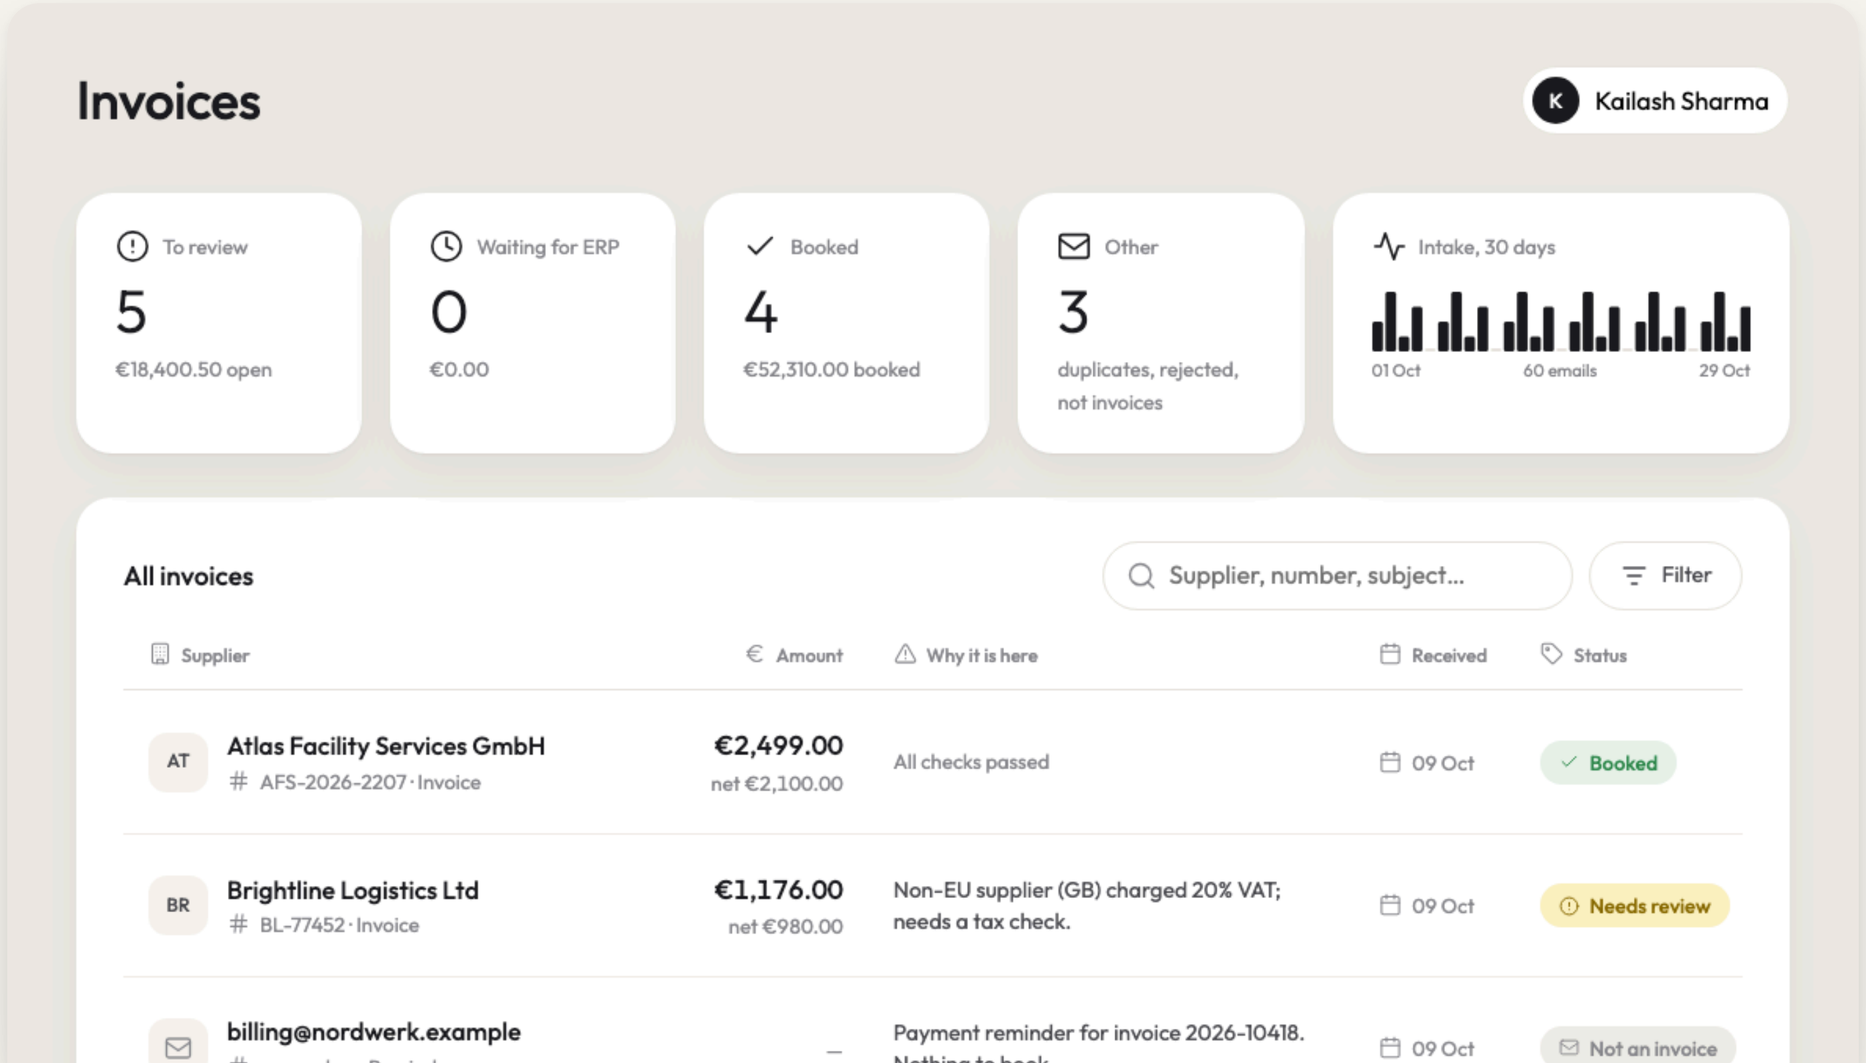

The AI reads.
The rules decide.

Every number must be in the document

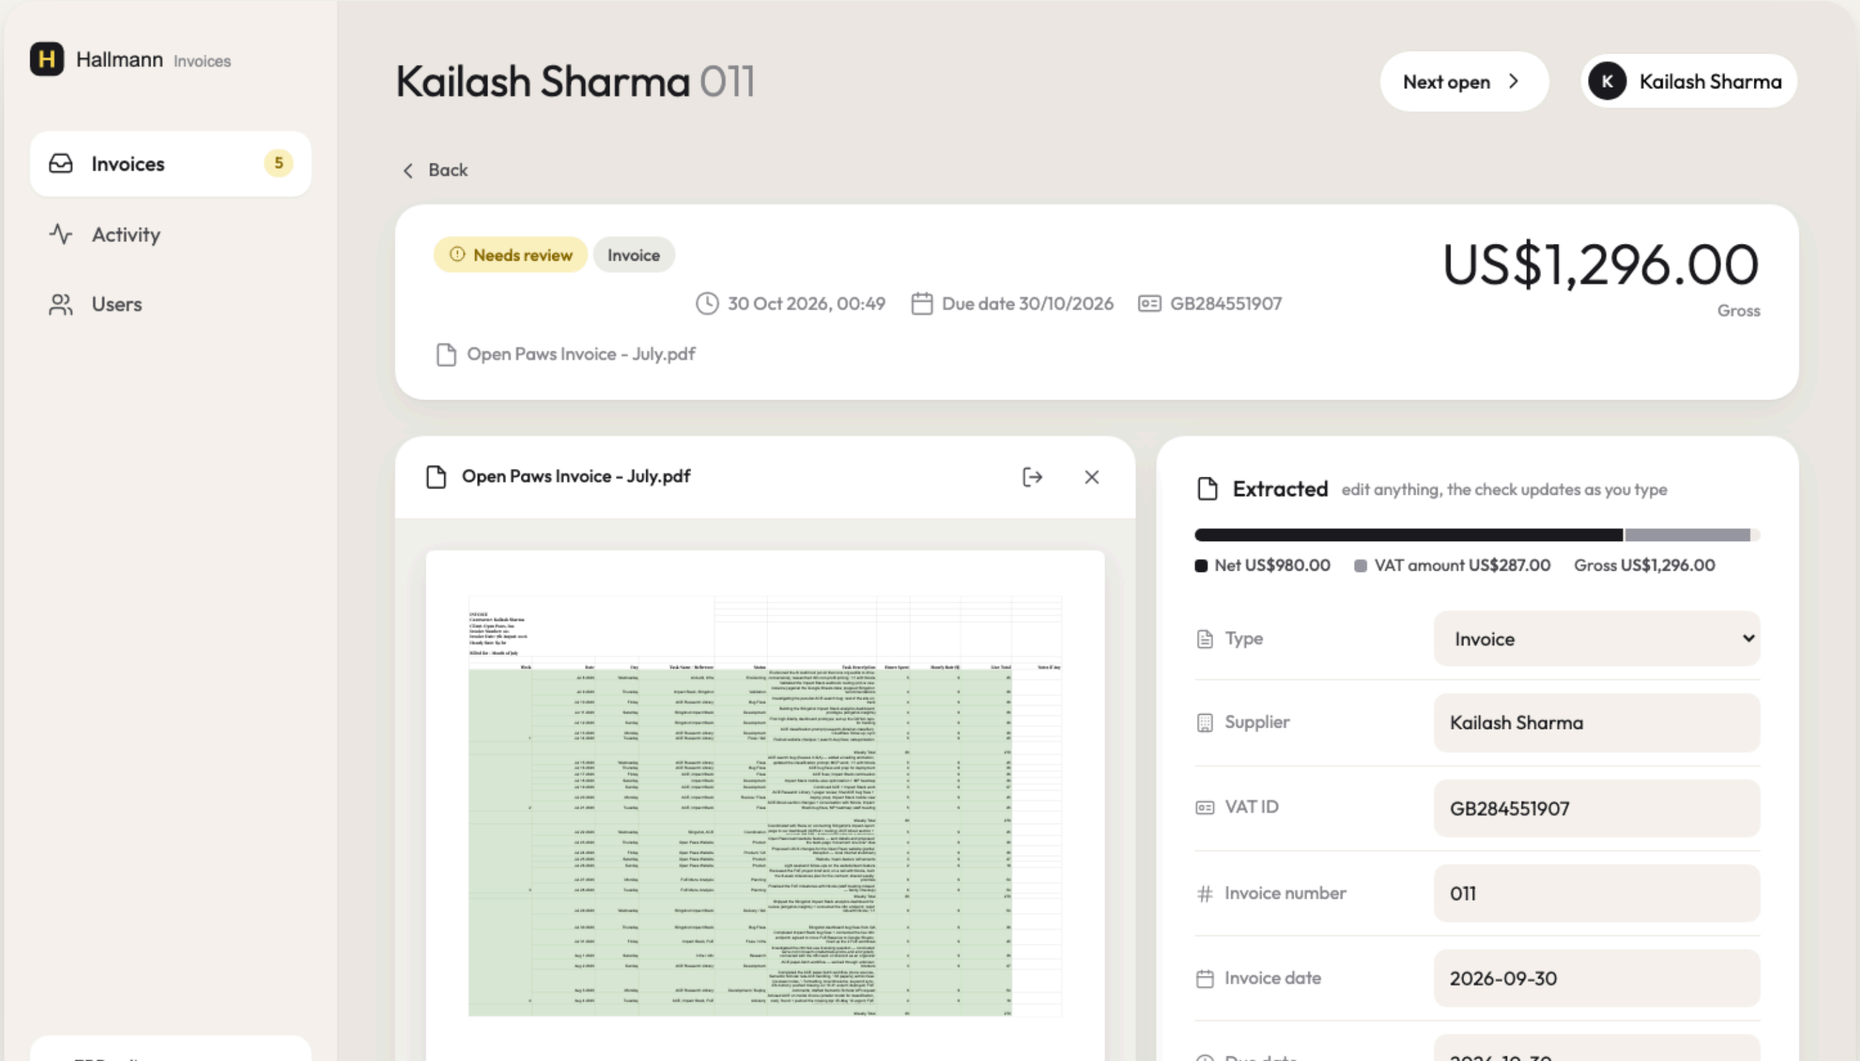

Net + VAT = Gross

Anything unsure → a person

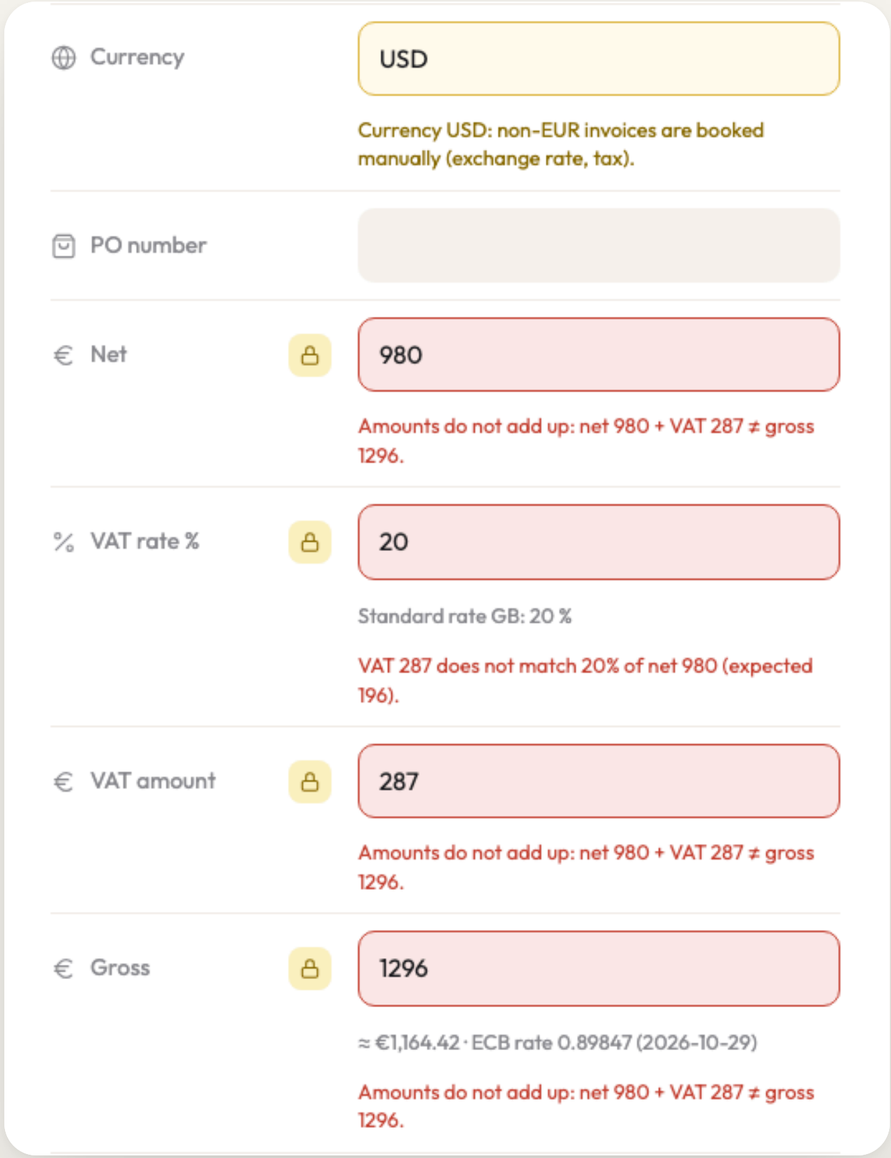

One screen for Jana and Thomas.

The original, next to the fields.

Red means fix.
Amber means check.

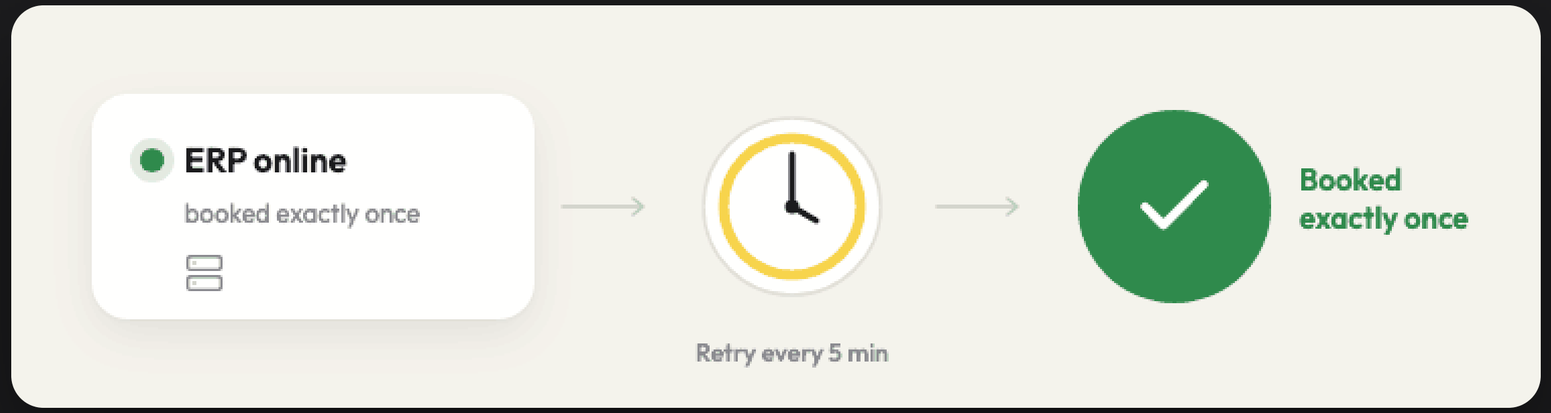

Every change.
Who, when, before, after.

Append-only audit log

Fraud doesn't book itself.

- Unknown supplier
- Changed bank details
- Look-alike sender

ERP down? It waits.

Retries every 5 minutes · booked exactly once · Avanai gets one email

NOW

Live demo

How we know it works

31
unit tests

19/19
emails end to end

25/26
invoice layouts

1×
booked after ERP outage

Before go-live

- Hallmann's ERP
- EU-hosted AI
- Dedicated mailbox
- Hosting + backups
- Supplier sync

Next

1. Connect ERP, mailbox, EU model
2. 4-week pilot, auto-booking off
3. Switch on, supplier by supplier

Thank you.
